Rutland, VT 05701

To Whom it may Concern,

I have been doing business with North American Infrared (NAI) for close to 10 years now and will continue to do so for many more years to come based on the results that I have seen with the infrared repairs.

NAI has completed repairs for me in a variety of areas but mainly in parking lots. I have found the repairs to be the best repair solution for asphalt issues, such as simple pot holes to areas of alligator cracking, areas that have un-raveled or an area that has had the top coat de-laminate. The repairs provide the best bond of existing and new asphalt, and repairs that I have completed many years ago have held up and have not had to be repaired again.

From an economical stand point, the repairs are faster than traditional saw cut, remove and back patch, thus allowing the traffic flow to return to normal quicker for the customer, and the cost of the repairs is simply less. And add in the fact of not having to repair more than once, there is not a better solution to repairing asphalt.

I highly recommend North American Infrared for repair and maintenance for your asphalt needs.

Sincerely,

Howard Williams
